STEEL DOOR CONSTRUCTION

Features And Benefits

① HCFC free polyurethane foam insulation provides impressive thermal performance

② Smooth finish, 22 and 24 gauge, hot dip galvanized steel skins provide long lasting resistance to rust while providing dent and delamination resistance

③ 12" Pine lock block with grooves for 6'8" doors and 24" Pine lock block with grooves for 8'0" doors prevents telegraphing

④ 1 3/16" jointed pine stiles, the widest stile in the industry, adds extra stability

⑤ Factory applied primer or factory painting offers protection against the elements

⑥ Composite bottom rail prevents rotting

EMBOSSMENTS

Our steel door collections offer unique embossments that complement different architectural styles.
